Coleman Defeated Coal Creek in Mutz Cup Game

Evenly Contested Match Results in 2-1 Score on Saturday on Local Field.

In one of the most interesting games of the season, Coleman and Coal Creek played a stiff battle in the Mutz Cup series, and the winners will play in the finals against the winners of the other semi-final game played the same afternoon.

The first score was about 25 minutes after the commencement, when Jimmy Joyce shot a goal on a penalty kick; shortly after Coal Creek scored on a nice shot by L. Milburn from the forward line, making the score 1-1 at half time. Coal Creek made many shots on L. Ford, Coleman's goalkeeper, but he played splendidly and earned well-merited applause. Chester, Coal Creek's goalie, also was called on to stop many dangerous shots.

In the second half Jimmy Joyce was very speedy and made several dangerous rushes on Coal Creek goal, being called off-side several times. Jimmy's pace was too swift for the opposing team's backs to fall back in defence of their goal. After repeated attempts Jimmy booted one between the posts sufficiently high for the goalie to be unable to reach it. J. Milburn, half back for Coal Creek, was ruled off the field for disputing with Referee Dugdale. This somewhat weakened the visitors, but they maintained aggressive offensive tactics, and both teams played for all they were worth right up till the whistle sounded the close of the game.

The Line-up

Coal Creek: D. Chester, E. Atkinson, D. McNay, J. Milburn, C. Perie, G. Simpson, R. Ferguson, L. Milburn, S. Smith, J. Brown, W. Atherton. Coleman: L. Ford, A. Balloch, Stuart, J. Park, Jimmy Anderson, Joe

HILLCREST BASEBALL TEAM WON AGAINST COLEMAN

Angelo Gentile's all-stars played Hillcrest baseball team on Friday evening here, the score being 6-5 in favor of Hillcrest. Milley and Yagor pitched for Coleman, John Kapalia catcher, Tabor and Beaver pitched for Hillcrest; Richards, catcher, D'Ercole of Hillcrest umpired.

DID IT EVER OCCUR TO YOU?

Falling into an unintentional trap is a very unpleasant "shaking up" experience. The editor knows! Going over to the parish hall on Friday evening with a hammer and with the intention of helping to pull some nails or try and drive some in the work of laying the new floor, such good intentions were dissipated more quickly than a snowball in — well! The old surface floor had already been torn up, leaving some older boards beneath. Just as "ye Ed" put his weight on the first board inside the door — crash! and down he went with a feeling that everything was U.P. The lower half of his body was in the cellar, and the other half wondering what had happened. Badly grazed skin and bruises which turned all colors of the rainbow furnished a good reason why the hammer was not wielded that night.

DEATH SWIFT AND SURE

A small dog reported to have been owned by Alf Hatfield met with a sudden and tragic death on Friday. Playing with other dogs on Main street, it did not notice the approach of a truck until it was on top of it. A few quivers and its small carcass stiffened out, causing feelings of pity among those who saw it, but were powerless to save the little animal.

Mr. Fraser of Edmonton is here visiting his daughter, Mrs. Frank H. Graham.

Kapalia, W. Anderson, Les Griffiths, J. Joyce, Tip Ferraro, W. Hirst, Jack Dugdale of Bellevue, referee.

Local News

Miss Mary McCallum of New Dayton is visiting her sister, Mrs. Luke Lindoe.

R. Shone defeated George Jenkins in the semi-final of the McGillivray tennis cup. The score was 7-5, 3-6, 6-4. Mr. and Mrs. J. Nash and Mr. and Mrs. F. Barringham spent a few days at Fairmont hot springs.

Mr. and Mrs. John Brennan left on Friday for two weeks' holiday, going first to Medicine Hat, and from there to Vancouver.

Mrs. S. W. Chahley was admitted to hospital on Saturday for an operation for appendicitis. She is reported to be making satisfactory recovery.

Miss Gladys Higinbotham has returned after spending the summer vacation with her parents.

Miss Yuill and several pupils of Cameron school, made a week-end hike to "window" mountain, leaving at 3.30 Saturday morning.

Mr. and Mrs. Wilcox of Brandon left for Arrow Lakes, B. C., after spending two weeks visiting Mr. and Mrs. A. McLeod.

The B.C. Que was recently re-decorated and several booths added, which greatly improves the interior appearance.

Constable Henderson of the R.C.M.P. is reported has been transferred to Ottawa, after several months duty in Blairmore and Coleman.

Walter Purvis, sales agent for International Coal & Coke Co., left by car for Saskatchewan to call on dealers during the next week or two. He was accompanied by Mrs. Purvis.

Mr. and Mrs. S. Howarth and son John, motored to Calgary and Banff for the week-end holiday. They visited Mr. and Mrs. Brocklehurst in Calgary.

The final game in the Mutz Cup series will be played at Blairmore on Saturday afternoon, and it is hoped a big turnout of Coleman supporters will be on hand to cheer the boys to victory.

Frank Fontin, driver of a bakery truck from Pincher Creek, was fined \$15 and costs by Magistrate Graham for driving to the common danger. A little girl was knocked down by his car on east Main street, but fortunately was not seriously injured.

Mrs. K. Holmes of Coleman, who has been the guest of her sons, Thos. and Alex McDickens, at Trail, B.C., left accompanied by her grandson, Ray, for Burton, where they will be the guests of Mr. Albert Johnson for two weeks.—Lethbridge Herald.

A bouquet of lovely gladioli blooms, sweet pea and other blooms were received from the garden of Mr. W. G. Harris, which retained their freshness and charm for over a week after they were picked. They were indeed appreciated.

In a letter received by Mr. McMullen of West Coleman from the Chow family, formerly of Coleman, who moved to China last year, the sad news was conveyed of the death of two more of their children, Elsie and Nancy. This makes four deaths in the family since they returned to China.

High school examination results are reported to have been exceptionally high this year, according to a statement by Jas. M. Allan, chairman of the board. Further details will be published in the next issue. The report was submitted at Tuesday night's meeting of the trustees.

Locomotive Foreman Shaylor of Crow's Nest is a veteran of the South African war, and some time when the editor has a chance to talk over bully beef, hard biscuits and plum and apple jam, a few reminiscences may come to light. A friend told of two stirring incidents but until they are verified, it is not wise to divulge them to a curious public. More anon!

Walking into McBurney's drug store during the week, a smelly of fresh paint greeted customers, and all hands were tearing down and putting up again in re-arranging the many articles offered to a discerning public. It improves the appearance and gives a wider display of the many attractive things with which the store is bountifully stocked. There is nothing like a change to re-awaken interest.

TEN YEARS AGO

Coleman Journal, Sept. 6, 1923. Saturday of this week will be the regular fortnightly pay-day at the local mines, when about \$100,000 will be distributed amongst the miners of Coleman. The mines continue to operate at practically full capacity, and future prospects are quite bright.

FERNIE ROTARY CLUB COLLECTING FOR NEEDY

Fernie Rotary Club is collecting funds for the Community Welfare Fund. The appeal states: "Remember there are over 50 cents a month that you feel that you can give. They believe that sufficient money can be secured in this way over a period of six months to take care of all emergency cases that may arise. As we stated in our last issue the need for funds is already very pressing and before adequate funds there will be a very much greater demand for help, so please give what you can."

ANOTHER "BRAIN TRUST"

The "C. C. Efers," short for Commonwealth Federation, boasts of having a brain trust of six chiefs, professors and Rhodes scholars. The Financial Post commenting on this states:

"The average age of the group is less than 32 years. Their enthusiasm is great. Their theoretical knowledge is perhaps adequate to the task and not one of them has ever been dismissed by ever having had to make any practical application of his theories, such, for instance, as making a success of a corner grocery store, running a factory to provide employment or managing a farm without getting into trouble with the sheriff. These are indeed great days for men with university medals and Oxford parchments!"

UNITED CHURCH NOTES

Sunday service, Sept. 10, will be as follows:—11 a.m. Morning Worship with music by the junior choir. Sermon: "A Mountain of Decision, Carmel, The Mount of Fire."

Sunday School at 12.15. 7 p.m. Evening Worship. Sermon: "Am I My Brother's Keeper?" Official board meeting at 2.30 p.m. in the church on Sun., Sept. 10. You are cordially invited to these services.

ST. CLARA'S CHURCH, COLEMAN

Next Sunday is the 13th after Trinity. The services will be 12.30 p.m. Sunday School, 7 p.m. Evensong and Sermon.

PANTRY SALE AND TEA

The W. M. S. of St. Paul's United Church will have a pantry sale and tea in the club room on Saturday, Sept. 9th, from 3 to 6.30 p.m.

DEATH OF W. S. BOSWORTH, FORMER COLEMAN RESIDENT

Was Purchasing Agent for International Coal & Coke Co. in Earlier Days.

Through a telegram received by Dr. R. K. Lillie, announcement of the death of Mr. Walter S. Bosworth reached town on Thursday, August 31, of his death in Vancouver that morning, after several months' illness. Recently Mrs. Lillie returned from that city, where she met Mrs. Bosworth quite frequently, when the latter's husband was very ill, so that the news was not unexpected.

From 1907 to 1923 Mr. Bosworth was purchasing agent for the International Coal Co., and during his residence here was married to Miss Irwin, who was employed in the offices. His birthplace was in Ogdensburg, N. Y., and he was a brother of the late Vice-President Bosworth, who was head of the C.P.R. steamships department.

He had been living retired for several years in Vancouver.

MORRISON BOYS AT COLEMAN

(Kimberley Courier)

A great reception was given the local lads at Coleman Saturday night after the fight—they could not get away from the crowd until they promised to go back to Coleman and give the fans a return bout. Crows Nest Pass boxing fans were given a treat on Saturday night, the best boxing card held in the Pass for some time being staged in the Coleman arena. Through the medium of the Kimberley Courier, the boys wish to express their thanks to the people of Coleman for their kindness and great reception given them.

GAME OFFICERS MAKE RESCUE

(Fernie Free Press)

Game wardens Cameron and Washburn rescued two Fernie lads, Edgar Wilson and Thomas Roach from a perilous situation on a cliff overhanging the south fork of the Elk river early Tuesday morning. The boys who were on a fishing trip, were endeavoring to make a short cut over a projection of a mountain when they reached a spot where they were unable to get up or down. A third member of the party brought the news to town and the game wardens undertook the rescue, which they effected after the boys had been in their trying situation for eight or ten hours.

S. Benedetto and Family Leave for Southern Italy

One of Earliest Arrivals in Coleman Returns to Homeland With Family

Mr. and Mrs. S. Benedetto and three children left on Sunday's train en route for New York, whence they will leave on the Italian Line steamship "Rex" for Italy. How long they will remain there are uncertain of, but it is probable Mr. Benedetto will return.

He came here in 1903, and has worked for the International Coal Co. During the war he returned to Italy and fought in the Italian army. Returning to Coleman he was married here in 1919.

Several parties were held in honor of the departing family, and he was given a farewell by the Ordre Indipendente Flor D'Italia, of which he has been a member for several years. Many old friends gathered at the station on Sunday afternoon to bid them farewell.

IMPROVING PARISH HALL

A hardwood floor is being laid in St. Alban's parish hall, volunteer workers gladly giving their help. This will complete the work planned this spring, when a new roof was put on and the interior altered and re-decorated.

It is intended to put on a series of whist drives with prizes for each evening and grand aggregate evening, to raise sufficient money to cover the balance of the cost, most of which has been paid by subscriptions among the church people and friends. Such help is greatly appreciated by the church officers.

DISTRICT COURT SITTING

District Court was held here on Wednesday, August 30th, Judge A. M. McDonald presiding. Several small debt cases were heard. Three were settled, one was decided in favor of plaintiff, J. Rinaldis of the Motordrome, \$7.50 and costs, and one adjourned to appear for various parties were R. Barnes, J. E. Gillis, G. A. Walker, Hogg & Menzies and H. Ostlund.

The Pythian Sisters have resumed their Saturday night whist drives and dances, and last Saturday evening the prizes were won by Mrs. Wilson, gets first; Mr. Caroe, second; Mrs. Caroe, ladies first.

Changing Civilization, The State, And The School

Prevailing economic conditions throughout the world have had a direct and calamitous effect on Canada, and particularly on the entire western half of the Dominion which has to depend so largely upon world markets for the profitable disposal of its products. The situation thus created was had enough for the people to be called upon to face, but, unfortunately, it was intensified throughout very large areas by successive years of drought and insect pests resulting in almost if not quite complete crop failure. Many people would have been able to fairly well contend against one of these adverse conditions, but were swamped by a combination of the two.

The result has, of necessity, been not only a loss of income and livelihood to thousands of individuals—because the losses in the agricultural world has brought unemployment and loss in the industrial world—but it has thrown a very heavy burden on all governments, while at the same time greatly reducing their revenues wherewith to meet that burden. People without incomes cannot, of course, pay taxes. Public services have had to be cut, and various economies enforced.

Canada, as a nation, and the Western Provinces in particular, have always been generous in making provision for the education of the youth of the land. They have been proud of their educational systems. They have never been backward in giving whole-hearted support to the improvement of education for their children and increasing the means of obtaining it by all. As a result, expenditures for education have been heavy, and school taxes high.

Owing to the necessity of cutting public expenditures in these times, some people have advocated a slashing of expenditures on education, involving drastic curtailments in the school facilities provided, and limiting the educational opportunities of the present generation. Serious reductions have already taken place, and in particular, teachers' salaries in rural schools have been reduced to a point where it is difficult for them to carry on. Nevertheless some short-sighted, panic-stricken people still clamor for still greater "savings" at the expense of the education of the children of today. To all such we would recommend a careful consideration of the following article contributed to the Victoria, B.C., Times, inasmuch as the application of the truths contained therein are by no means confined to the Province and people of British Columbia.

With economic conditions as they are, we hear on all sides the most fantastic suggestions about closing the schools, doing away with high school education after the age of 14, save for those who can afford to pay fees, about elimination of school services that make for education efficiency, about merciless slashing of teachers' salaries.

"Teach 'em till they are fourteen," said a man of reputed mental brilliance to me the other day. "Teach 'em till they are fourteen, then let them go,—unless their parents can afford to pay for them to go in for higher education."

"Let them go." But where? In Vancouver alone 40,000 children are attending school. What if 4,000, 5,000 of them were turned out of the schools? Were not able to go back this year? And probably as many more throughout the province?

Twenty years ago such children might have been absorbed in unconditioned labor of some kind, in apprenticeship, in farm work (though not in British Columbia this last).

What is there for them to do now? What? And as every mother, every teacher knows, fourteen is a dangerous age. Britain has been through a pretty bad time these last ten years, but she has not cut her school services. As a matter of fact she has increased them. She knows she had to.

It seems to me if any of these drastic curtailments suggested by reactionaries are done save in tentative moderation and as temporary expedients, a Dark Age will set in.

Of course, the highest work in the intellectual world always seems to be beyond the range of intelligence of the majority of people. A nation's rank in the world may be estimated as high or low by the amount it allows itself for the higher kinds of work that is for its teachers, its clergy, its inventors, its social service workers, its creators of all kinds of art. Take the nations and see how they measure up in your estimation to this axiom.

If a nation wants able men and women to deal with and teach its children, it must pay for ability.

A mean demand will meet with a mean supply.

And the nation in the long run will be the loser. Canada cannot afford to lose in this matter of education. Children of this changing civilization for changing it is and very rapidly in form and ideas,—cannot afford to lose. We, the adults of this generation, have no right to steal from the future generation anything in the matter of educational opportunities or wisdom.

"Young Canada we stand on guard for thee" was the apt and intentional misquotation used by Dean D. Buchanan in his address to the British Columbia Teachers' Federation, in convention. It tersely sums up the attitude of teachers and parents during this time of economic stress.

Holding of "air circuses" on Sunday is being fought in England.

American cosmetics are now in demand in North Manchuria.

Exports of cotton from Egypt this year are much greater than in 1912.

Weakening Diarrhoea Dangerous Dysentery

Diarrhoea and Dysentery do not need to run for any length of time until the whole system is weakened and debilitated. Few other diseases so quickly undermine the strength and bring about a condition of prostration and often collapse.

Dr. Fowler's Extract of Wild Strawberry is not only prompt and effective in checking the looseness of the bowels, but at the same time it strengthens, stimulates and braces up the system.

Never without a bottle of Dr. Fowler's. Always prepared in case of emergency.

Free-Handedness Of Patrons Means Terrible Loss To Railways and Hotels

How many towels are, let us say, appropriated by railway passengers? The figures for English trains are staggering, an English railway detective being authority for the statement that 25,000 towels were taken from the trains of one system last month. He says also that the thefts of cups, spoons, window straps and glasses cause a loss to British railway companies of thousands of pounds a year. Most of these disappearances occur in the summer holiday season. Hotels and restaurants, on the other hand, sustain their heaviest losses at Christmas, when glasses, jugs, ashtrays, cutlery and linen vanish by wholesale. According to an English hotelkeeper, this practice of picking up useful or fancy little articles is more frequent among well-to-do people than among the less fortunate. There is an aspect of this interesting custom which is not often thought of, and that is the necessity of not offending a good customer when misadventure has revealed his free-handedness with mine host's property. Some years ago a valued guest, having paid her bill, was making her way to the door of the hotel when one of the hotel's spoons clattered to the floor. An attendant promptly picked it up and hastened after her, with the obvious intention of handing it to her as if it had been her own, but his well-meant effort to save the lady's face was foiled by an acceleration in her speed which almost turned it into flight. The attendant's fears were realized. She never stayed at that hotel again—New York Evening Post.

Doing Good Business

With Other Countries

Japan Rapidly Forging Ahead Opinion Of British Shippers

"The thing that impressed most on my five months' tour of the world was the way Japan is forging ahead in her business with other countries, and the way she is leading us by the hand," stated R. S. Dalgleish, British shipowner of Newcastle-Tyne, who reached Victoria recently from Australia. He spent several days at Vancouver before crossing the continent en route to England to complete a trip around the world. "Japan has knocked Great Britain and the United States out," Mr. Dalgleish declared, "and the sooner we wake up to that fact the better for us all. Our costs are too high, and the sooner we get rid of tariffs, subsidies, restrictions and quotas the better."

Can Do Seventy Miles

Manitoba Police Using Midget Car For Highway Patrol Work

Two six-foot Manitoba patrolmen arrived at Calgary on business, driving a motor car which makes a Baby Austin look big in comparison. The midget auto was imported from England for highway patrol work. The two men sat side by side and big cops form an ideal combination for the job.

Both men are employed by the Manitoba Motor League Safety Patrol, and have authority to lay information and make arrests in connection with infractions of the Motor Vehicle Act of that province.

They stated that their little car can make 70 miles an hour, even on gravel highways.

Fingerprints Are Valuable

Worth Far More Than Photographs In Many Cases

Fingerprints as well as photographs should have their place in the family album, Police Commissioner Austin Roche, Buffalo, N.Y., told the annual convention of the international association of chiefs of police at Chicago.

"These prints," said Roche, "would be of great value in cases of missing persons or kidnapping. They would be worth far more than photographs in many cases."

Roche suggested the fingerprints be taken of a person as a child, thus assuring him his identity would be preserved as long as he retained his hands.

Paying Fourth Visit

The Graf Zeppelin will pay its fourth visit to the United States in October. Postmaster-General Farley announces. Plans for the flight to the Chicago Exposition, by way of South America, Mr. Farley said, will include the issue of a special stamp to be put on letters carried by the German dirigible.

Nearly 2,500,000 people buy one or more of the 65 radio publications in Germany every week.

Has The Right Idea

Prefect Of Paris Police Would Control Blowing Of Auto Horn

Jean Chippie, Prefect of the Paris Police, has prescribed a trumpet of low pitch and single note for Parisian automobiles and has prescribed all other instruments of noise, according to a letter he recently wrote O. C. Cabot, an official of La Societe pour la Suppression du Bruit.

Mr. Cabot had written the Prefect as follows:

"Experience has demonstrated that horn-blowing is rarely, if ever, necessary at all in the city and that mechanical and loud horns should be totally suppressed. Any motorist who attempts to cross an intersecting thoroughfare at full speed, relying solely upon his horn, risks a serious accident. If he slackens his pace and looks to right and left, surely the horn is superfluous. We are convinced that it does not do ten when a loud blast from an unseen vehicle is heard by the driver of a given vehicle. It is quite impossible for the latter to decide from which direction the warning has come. Yet 50 unoffending citizens have had their hearing outraged and their nerves lacerated for nothing."

"The usual reason given for sound-horn is the wish to pass another car. But when the car in front is already proceeding at sufficiently high speed this racing propensity should be sternly discouraged in town streets, as a large percentage of accidents is due to this practice."—New York Times.

Won Honors At Oxford

Blind Girl Used Text Books Transcribed Into Braille

Miss Helen Winter, a blind Oxford undergraduate, has gained first-class honors in the final honor school of modern history. At the age of 17, while still a pupil at Clarendon College, the public school run by the National Institute for the Blind, she won an open scholarship at Lady Margaret Hall, Oxford. As she is unable to read ordinary printed matter all the text-books required in her work at the university have been transcribed into Braille for her by volunteers attached to the National Institute for the Blind.

Miss Winter, who was born blind, is a daughter of the late Colonel C. B. Winter, D.S.O. After a short holiday on the Continent she intends to take up historical work in conjunction with coaching. Her ambition is to obtain a lectureship in history. Miss Winter's only recreation at Oxford was swimming.

Nova Scotia's New Premier

Is Not First Roman Catholic To Head Province

Angus L. Macdonald will not be the first Roman Catholic Premier of Nova Scotia, as stated in some newspapers. They have overlooked J. S. Thompson (later Sir John), who was Premier and Attorney-General in 1882. There may have been others, but Sir John's eminence as a statesman should have recalled the name. The first Premier of Ontario was a Roman Catholic, John Sandfield Macdonald, possibly of the same clan as the new arrival in Nova Scotia—Toronto Mail and Empire.

Honesty is the best in the long run. But, on the other hand, if you are honest you do not have to run.

Argentine cable companies are boosting rates.

Friend: "What make is your nephew's new car?"

Old Lady (rather vague about such things): "I think, my dear, I heard him say it was a 'waw'."

A "radium clock" was used to find the age of the earth. Erosion of the soil and salt is also an "hour-glass."

Many people who feel sour, sluggish and tired, make the mistake of taking salt, oil, mineral water, laxative candy or sweetening gum. These things only irritate the bowels and injure the liver.

When you feel tired, wake up your liver bile. Start your liver pouring the daily tea. Never be afraid to use your bowels. Get your stomach and intestines working as they should more.

Carter's Little Liver Pills will soon fix you. Purely vegetable. Safe. Sure. Quick. Ask for them by name. Refuse substitutes. Be fit as a fiddle.

Established New Record

French Artist Crossed Atlantic Alone In Six-Foot Sloop

Claiming a record for a one man crossing of the Atlantic under sail, Martin-Marie, French seascape painter, whose real name is Durand Couper, arrived at New York August 24, aboard the thirty-six-foot sloop "Winnibell II," which he navigated single-handed from Brest.

Coming by way of Madeira, Dominica, and Port of France, Martin-Marie has covered 2,850 miles since May 10. The famous Captain Slocum, in the equally famous "Spray," set the previous record mark, with a crossing from Cape Sable to Lisbon in twenty-eight days.

Marie took twenty-nine, but in that time he covered 250 miles more than the earliest mariner.

The "Winnibell" was launched at Boulogne in February, and it has several devices permitting navigation by a one-man crew. The sloop can be steered from the cabin. All the hallways run aft through leading blocks. A cover can be placed over the cockpit, and the "Winnibell" completely closed up, with her pilot inside.

Marie's purpose was to gather material for his seascapes. During the voyage to Martinique, he said, he took over the tiller only thirty-seven hours. For twenty-seven days he did not touch the helm. En route from Martinique to New York, he steered only three days. When the robot was at the helm, he could go below and sleep for hours or roll on deck in good weather as much as he pleased, confident that his sloop was on its course.

Like Canadian West

Lord and Lady Macmillan Hope To Return For Longer Visit

Lady Macmillan, whose distinguished husband heads the Royal Commission on Banking in Canada, likes the Canadian West and hopes to return for a lengthier visit soon. "We've been to Canada four times, but we've had only the most tantalizing short glimpses of the Rockies and the Prairies," she said. "Some day we hope to return for a full holiday and peek some of the far away mountain trails that appeal to us so much."

In 1926, Lord and Lady Macmillan were in Saint John for the meeting of the Canadian Bar Association; in 1928, they visited Regina for the Bar convention when Lord Macmillan represented Britain at that gathering.

The Macmillans made a distinct appeal for Lady Macmillan, who is keenly interested in the Scottish people of Canada. "We are Scottish, you know, not English," she said.

While in Victoria, Lady Macmillan secured some flower seeds from the Butchart Gardens for their country estate in Surrey.

Veteran Engine Scrapped

Locomotive No. 2717 Only British Engine Captured By Germans

A battle-scarred British war veteran and ex-German prisoner of war, with a travel record of more than 1,200,000 miles, has just passed away. This "hero" was locomotive No. 2717, believed to have been the British railway engine to have been captured by the Germans. It has just been withdrawn from service and broken up.

While in use on the British front at Cambrai in 1917, No. 2717 was captured by the enemy and for five months was used as a machine-gun post in "No Man's Land." Following the March retreat the Germans removed the engine, patched up the bullet and shrapnel holes and used her for railway service until she was recaptured by the British in 1918.

On return to home duties after the war the engine was decorated with a plate recording its war services.

A Guilty Conscience

Silverware Returned To Hotel When Purloiner Has Change Of Heart

Gingerly, the hotel manager at Murray Bay, Que., unwrapped a large package. And from the fold of brown paper appeared: Two demitasse cups and saucers (cardinal's pattern and the hotel's pride and joy); four demitasse spoons, one silver finger bowl, one butter knife and two tea towels. The package was accompanied by a letter, saying the sender—formerly employed as a waitress—had joined the Oxford group movement and was returning articles stolen from the hotel.

Friend: "What make is your nephew's new car?"

Old Lady (rather vague about such things): "I think, my dear, I heard him say it was a 'waw'."

A "radium clock" was used to find the age of the earth. Erosion of the soil and salt is also an "hour-glass."

bad complexion? Act at once! Only a clean inside can give you clear skin. You need Enos every morning.

TAKE ENOS' FRUIT SALT

Financial Strength Of Britain

Deposits In One Bank Increased \$179,000,000 In Year

There is a striking indication of the financial strength of Britain in the matter of the saving of money by Britishers, contained in the annual report of a leading bank, one of the Big Five. The deposits compared with last year show a clear gain of \$179,000,000.

The general prosperity of the institution was shown in the maintenance of three classes of dividends, one of 10 per cent, the others of 14 per cent each.

With total resources approximating two billions of dollars, there is summed up a satisfactory money prospect of a wide margin, such as was hoped for by the action of the Economic Conference, that is most reassuring.

The increased savings on deposit tell the story of latent financial reserves in England. This is reflected in the statement of the large dividends earned, and paid—Winnipeg Tribune.

Germany Wants Saar Basin

Willing To Offer Franco Concessions For Return Of Territory

"Germany is prepared to ask France to cede her rich territory of the Saar Basin before 1935, in return for which Germany proposes to guarantee the protection of French interests in the Saar and to support an economic intergovernment between the Saar and Alsace-Lorraine," said Dr. Carl Lutz, German industrialist and coal owner, in discussing Franco-German problems during an interview at Moscow.

"Under the terms of the Versailles Treaty," Dr. Lutz explained, "the Saar territory which is wholly German in population and outlook, is governed under mandate from the League of Nations and a plebiscite of the population will be taken in 1935 to determine whether at that date the land shall revert to Germany or continue under its French domination."

Television Tests From Crystal Palace Tower

Commanding Height Far Above Thames Makes Place Ideal

Negotiations have just been completed to permit experimental television transmissions from the south tower of Crystal Palace. The transmissions will be made for the first time, on ultra short waves below eight metres.

This tower is regarded as ideal because of its commanding height. It stands 550 feet above the Thames level.

Recently H. Thomas, the assistant organizer of Crystal Palace, a wireless expert, carried out experiments from the north tower with a amateur transmitter (Qcqb), using a five-metre wave.

Reports of successful reception came from various parts of the country, some 200 miles away.

Queen Receives Degree

When the degree of Doctor of Music honor of the Royal College of Music was conferred upon the queen, her majesty received from the Prince of Wales a jewel and chain as a gift from the college, of which he is president. The degree was conferred at Buckingham Palace by Sir Hugh Allen, director of the college; Lord Palmer, vice-president, and Charles Morley, honorary secretary.

The man who spanked Adolph Hitler is still alive in Austria. It seemed a useful idea at the time but nothing came of it.

Cloth ordered recently by an English railway for its employees totaled 255 miles.

Definite Action Has Been Taken Toward Forming United Party In Ireland

Dublin, Irish Free State.—The Centre Party and William T. Cosgrave's Cumann nan Gaeil, in separate meetings agreed to accept proposals to merge with General Eoin O'Duffy's banned National Guard, thus taking definite steps toward establishment of a new United Ireland Party.

Action came at conferences of leaders of the two parties and it was subject to ratification by the respective general party conventions. The executives recommended party conventions be held September 9.

Under the plan, General O'Duffy would head the new party and Cosgrave would serve as the party's chairman in the daily eireann. Frank McDermott, head of the Centre Party, was designated as vice-president of the new organization.

The three old parties would have equal representation on an executive committee of 12 members.

Word O'Duffy would head the new party created a sensation here because it was generally believed any amalgamation would result in Cosgrave emerging as leader.

O'Duffy's attitude toward the merger was considered to have been made clear in the last issue of "The Blue Flag," in which it was stated: "We hope the efforts now being made will be successful. There is little doubt the general election will soon take place. When it does, Flanna Fail (the party of President Eamon de Valera) must be defeated."

Previously McDermott had been in close touch with Cosgrave leaders on the question of merging. It has been predicted the main plank of the new party will be cessation of the current trade deadlock with the United Kingdom.

Anxious For Peace

But De Valera Does Not Want Britain To Adopt Arbitrary Stand London, Eng.—President Eamon de Valera told the London Daily Herald at Dublin that he was "anxious for peace" with the United Kingdom, but that it must not be dictated by strong means.

"I am anxious for peace," said the Irish Free State president. "If there is a sincere desire on the part of the British to negotiate, we are ready. But the negotiation should be conducted in saying 'These are our terms, you must accept them.' It must not be another case dictated by force and accepted under duress."

De Valera added that he thought possibly it suits the London government to leave things as they are.

Passengers Got Thrill

Sky-Riders Stalled Between Towers Chicago.—Several passengers on the sky ride at the world's fair had a thrill when three cars were forced to halt in mid-trip by a broken telephone wire that fell across the cable supporting the cars. Hanging 210 feet above the lagoon across which the ride takes passengers between 650-foot towers, the passengers remained calm and surveyed the fair grounds for more than an hour while workmen in tiny chairs that ran out on the cables fixed the wire.

Four Cases In Week

Calgary, Alta.—Four new cases of infantile paralysis were reported to the Calgary medical health department.

International Wheat Pact Should Do Much To Restore World Prosperity

London, Eng.—Argentina's signature to the international wheat agreement put the finishing touch to a pact which, the negotiators assert, will rehabilitate the wheat industry and thereby do more toward restoring world prosperity than could any other single factor.

Wheat experts here assert that unless the world's impoverished wheat farmer is put on his feet there can be no universal prosperity.

Argentina became the 22nd nation to sign the pact, the general purpose of which is to reduce production by the great wheat nations and stimulate consumption in the importing

Search For Old Forts

Expedition To North To Unfold Glamorous History Of Early Days

Prince Albert.—A unique expedition left here recently when Prof. H. A. Innis, of the University of Toronto, and J. R. Tyrell, Toronto, president of the Kirkland Lake Mining Company, set off in an outboard motorized freight canoe with two guides to search for locations of old forts on the North Saskatchewan and Saskatchewan rivers east of here.

One of the objects of the expedition will be to relocate the remains of Fort a la Corne, originally established in 1748 by La Verandrye and first named Fort St. Louis. Some doubt has arisen as to the exact location of this fort and those on the novel expedition will attempt to remove these doubts. This is one of the oldest forts known in the history of the west and about it and the other forts in this part of the province is written the glamorous history of the early fur trading days when the flowing streams in this part of the province were the main arteries of travel. The two will spend a week in their quest.

Wins Swimming Marathon

Marvin Nelson, Of Iowa, Captures Toronto Classic

Toronto, Ont.—Swimming history was written in the blue-green waters of Lake Ontario when Marvin Nelson, confident Fort Dodge, Ia., youngster, crossed the finishing line in the Canadian National Exhibition 15-mile marathon just seven hours 37 5/8 seconds after he had plunged from the starting barges.

Nelson's phenomenal performance gives him the world's professional title for the distance, and \$5,000 in cash from the Canadian National Exhibition. He clipped more than 19 minutes from the world's record time set by George Biagden of Memphis, Tenn., and accomplished something no other man had ever done in winning the marathon twice. Nelson won the event in 1930 but took 22 minutes longer to cover the distance.

Raps National Recovery Act

Nebraska Man Describes New Movement As "Pure Bunk"

Lincoln, Neb.—John H. Simpson, president of the National Farmers' Union, said he did not blame individual farmers for taking all the government money given under the United States crop reduction plans, but added:

"It is against the laws of God and nature to plow up cotton, destroy things that could be used for food, and limit production. The N.R.A., Simpson asserted, is 'bunk, pure bunk to keep the suckers' minds off the real thing and is invented by Morgan and Mellon and others."

Conquers English Channel

Dover, England.—The English Channel was conquered for the first time this year when Sunny Lowry, 22-year-old Manchester girl, arrived at South Foreland after swimming from Cape Gris Nez, France, in about 15 1/2 hours. She had made two attempts before succeeding in becoming the 18th swimmer and the eighth woman to swim the treacherous strip of water.

B.C. Voting November 2

Proclamation Announces Date Of Provincial Election

Victoria, B.C.—Voters of British Columbia will go to the polls, Thursday, November 2, to elect the province's 18th legislature. Official proclamation announcing the date of the provincial general election was signed by Lieut.-Governor J. W. Fordham Johnson. Nominations will be made October 12.

The 17th legislature was dissolved August 1, after running its full course of five years. With dissolution the 1932 Redistribution act came into effect, reducing representation in the legislature by one seat to 47, changing the boundaries of many ridings and adding a new seat in Peace River.

In the last election, July 18, 1928, the Conservatives, headed by Hon. S. F. Timole, were returned, electing 36 members to 11 Liberals and one Independent Labor.

Early this year Premier Timole fell in his efforts to form a coalition ministry with the Liberals, headed by Hon. J. Pattullo and W. J. Bowser, leader of a non-party group.

At least eight different parties have entered this year's election and have already nominated a total of 114 candidates. This number will be greatly increased by the time polling day comes around.

Wheat Crop Estimate

268,000,000 For Western Canada Is Forecast

Winnipeg, Man.—A wheat crop of 268,000,000 bushels for western Canada this year is estimated in the fourth crop report of the Weekly Market News compiled and edited by W. Sanford Evans, noted crop statistician, and issued here.

Estimates are based on reports from 337 crop correspondents in the prairie provinces combined with estimates of yields from 1,500 other plots. Manitoba's wheat crop is set at 33,000,000 bushels, Saskatchewan at 130,000,000 bushels, and Alberta at 105,000,000 bushels, the figures being subject to revision.

Manitoba and Alberta crops maintained their prospects during August, but in Saskatchewan there was further deterioration, the report adds.

The wheat crop is reported to be 73 per cent. cut and 24 per cent. threshed, with about 88 per cent. of the wheat crop now beyond further deterioration by frost, but grasshoppers are still present.

Yield of oats for the prairies is set at 20 bushels to the acre and barley at 16 bushels to the acre.

Ontario's Relief Bill

Estimated Total Of \$30,000,000 To End Of Fiscal Year

Toronto, Ont.—At the end of Ontario's fiscal year, it is estimated a total of \$30,000,000 will have been expended within the province on relief by the province, Dominion and municipalities. Of this sum the provincial exchequer will have provided about \$13,750,000, the Dominion about \$9,500,000 and the municipalities about \$6,750,000.

From the first of 1930 to the end of July this year, the total bill was \$7,800,000, of which the province has contributed \$2,800,000, the Dominion \$2,310,000 and the municipalities \$2,690,000.

AS ROME WELCOMED BALBO

Here is the triumphant procession with which the Eternal City welcomed General Italo Balbo and his men on their return from the epic mass flight to Chicago and back. The parade is coming through the historic Constantinian Arch on the way to Palazzo del Senato, where the fliers were received and decorated by Premier Mussolini. At top, Il Duce is shown decorating Balbo.

NOVA SCOTIA'S NEW PREMIER

Angus L. MacDonald, 43-year-old native of Inverness County, leader of the Liberal Party in Nova Scotia, which secured 21 out of the 30 seats, defeating the government of Hon. G. S. Harrington. The premier-elect has not hitherto had a seat in the House.

Experiment Of United States Being Watched

Countries Interested In Stabilization Of Currency Through N.R.A.

Banff, Alta.—If the United States can stabilize its dollar through the operation of the N.R.A., stabilization of currencies by three or perhaps four other great nations will follow, and thereafter will come stabilization of the currencies of the rest of the world. This, in brief, was one conclusion reached at the conference of the Institute of Pacific Relations just ended.

Meanwhile, other countries are closely watching the progress of the N.R.A. application, and the importance of the experiment, having regard to the social and economic welfare of the people of the world, cannot be overestimated, it was agreed.

Currency stabilization is linked with trade stabilization and with solutions of the problems of population pressure, so insistent in Japan and China; of trade conflicts, as, for instance, the bitter rivalry between Lancashire and Japanese textile spinners, and of disturbed relations between countries. The dispute of China and Japan over Manchuria was given as an example.

Junior Trade Commissioners

Two Western Candidates Qualify For Appointment

Ottawa, Ont.—Robert A. Cameron, Edmonton, and Christopher H. West, Cranbrook, B.C., were among the six high ranking candidates for posts as junior trade commissioners, the civil service commission announced. They probably will receive appointments shortly.

J. M. Boyer, Hartland, N.B.; Greig B. Smith, Ottawa; G. Nairn, Montreal, and Leland Auman, Toronto, were the others in the first half dozen trying examinations.

More than 400 candidates wrote on the examinations after which oral examinations were given to 87 who stood highest, the examiners traveling across Canada for the purpose. The six candidates will be named junior trade commissioners, it is expected.

All Nations Co-operate In Working Out Solution Of The Wheat Problem

Conciliation Board

Will Hear Wage Disputes Of Railway Employees

Ottawa, Ont.—Hon. W. A. Gordon, Minister of Labor, announced he had appointed two boards of conciliation to hear wage disputes between the Canadian National and Canadian Pacific Railways and their employees.

The first board will inquire into a dispute between the Canadian Pacific Railway and its clerks, freight handlers and station employees, numbering about 3,000. George S. Currie, Montreal, and W. F. O'Connor, Toronto, will be two members of the board, representing the company and the men. They will select a third member who will be chairman.

The second board will investigate two wage disputes between the Canadian National Railways and its men. The first dispute involves 4,300 men, clerks, freight handlers, laborers and employees of the ferry service between Toronto, N.B., and Borden, P.E.I., and wharf employees at Halifax. The second dispute involves 847 employees, clerks of the railway's headquarters at Montreal. Two members of the board will be F. C. Dobell, Montreal, representing the company, and Rev. Russell McGillivray, Ottawa, representing the men. They will choose a chairman.

Dawson Has No Unemployed

Recent Activity In New Gold Fields

Victoria, B.C.—Dawson, in the Yukon, is one city in Canada that can report an absence of unemployment, according to G. A. Yardley, customs inspector, who has returned from an annual inspection tour of the Yukon. All labor in Dawson has been absorbed by recent activity in new gold fields. Mr. Yardley stated, and he predicted another boom in the Yukon country.

Freight imported into the country this year was 800 tons greater than 1932 figures, which in turn were 500 tons greater than those of 1931.

He predicted that output of gold from the Yukon this year would be between \$350,000 and \$400,000 greater than last year.

Brandon Aviator Injured

Accident Occurred When Propeller Of Monoplane Broke

Brandon, Man.—Crashing to the ground when the propeller of his monoplane broke, Alvin Kennedy, instructor for the Brandon Aero Club, escaped serious injury, but was detained at the Brandon General Hospital, where minor injuries were attended to.

The machine had been built locally and was owned by Gordon Brown. It had been taken up as high as 1,000 feet a few days ago, and, as the pilot put it, "behaved well."

Lack Of Grain Cargoes May Shorten Shipping Season At Churchill

Ottawa, Ont.—Churchill, three-year-old seaport of northern Manitoba, may find its shipping season ended long before the freeze-up, according to reliable information here. Seven ships loaded with grain have already sailed and two more, including the "Gardena," now en route to that port, are yet to load. This will clear out the 2,500,000 bushels stored in the elevator and it is stated only 6,000 bushels are en route to the port from inland points.

The understanding here is that no more ships have been chartered to proceed to Churchill and none will be until there is more grain in sight. Some attribute the shortage there to the general slowing up in export shipments, while others advance the suggestion that the rate cutting down the Great Lakes has narrowed any advantage in shipping via Churchill, despite the lower rates this season between that port and the United Kingdom as compared with last year.

With a shipper's market prevailing lake tonnage is being chartered at the lowest rates for some time, according to advice from Port William recently. Lake freight rates to Montreal, which were as high as six cents

On Board the "Empress Of Britain."—World co-operation in regulating the supply of wheat to demand as arranged by the agreement reached at the recent world wheat conference in London, England, marks a distinct step forward. Hon. M. A. MacPherson, attorney-general and provincial treasurer of Saskatchewan, is convinced.

Fresh from attending the wheat conference as an observer on behalf of Canada's three prairie provinces, which between them contain the world's greatest wheat lands, Major MacPherson returned to Canada Thursday, Aug. 31. He plans to stop in eastern Canada and will then push on to the west.

The wheat problem is far from solved, Major MacPherson warned. The present arrangement, providing for control of exports and a measure of control of production, was bound to come.

One thing that agreeably surprised him, he said, was the eagerness of all the nations represented at the conference to co-operate in working out a solution of the wheat problem.

One of the reasons for the attitude on the part of the importing countries at least, he believed, might have been the bountiful crops in Europe this year. France, Germany and Italy, said the prairie representative, all had huge crops. The Russian crop was also good. Fears for the dry weather in Europe this summer had produced an unusually hard wheat so that the importation of hard wheat for blending purposes in milling would not be as greatly needed as in a normal year.

No Fear Of Kidnapping

Bar Association Says No Occasion In Canada To Become Panicky

Ottawa, Ont.—Life imprisonment with lashes as the punishment for kidnapping will not be recommended by the administration of criminal justice committee of the Canadian Bar Association, but the question will be held over until next year, the convention of the association decided.

The present law provides a kidnapping is liable to 25 years imprisonment, and this was believed to meet the situation. "The committee," according to a leading member of the committee, "is of the opinion that there is no occasion to become panicky in Canada at the present time."

A recommendation for the abolition of the grand jury in Ontario was adopted.

Serious Feed Shortage

Toronto, Ont.—Feed shortage in Essex county, announced the Ontario Department of Agriculture, has hit the cattle and hog-raising industry in the southern county in a serious condition. Probably 10,000 head of livestock, including cattle and hogs, will have to be sold at a sacrifice on account of feed shortage.

A bushel last year, have dropped to from 2 1/2 to 3 cents. The rates from the Head of the Lakes to Georgian Bay ports range from 1 1/2 to 1 3/4 cents as compared with 2 cents last year.

The rate to Buffalo is also lower, having dropped from 1 1/2 cents last year to 1 1/4 now.

Advices from shipping interests in Montreal are that the rates still remain lower from Churchill than from the Head of the Lakes to the United Kingdom and European ports so the new crop wheat that can reach Churchill more economically than Port Arthur and Fort William may revive the flow to the new port. However, no such revival is yet in sight. Strenuous efforts were made to lengthen the season Churchill might open. This year the insurance companies responded somewhat to this pressure by extending the date when ships could leave the port without paying additional insurance.

On hulls and machinery, from September 30, the final date last year, to October 7. The port therefore has well over a month in which it can ship if the grain is available.

NOTES AND COMMENTS

THIS week Canadian week-ly newspaper editors from Newfoundland to Vancouver Island are holding their annual convention in Vancouver. Since the organization of the C.W.N.A. it has been the rule to hold the annual gathering in a different province each year, thanks to the courtesy and co-operation of railway and steamship companies over whose lines the members travel.

ELEVEN or twelve years ago the newspapermen met in the coast city, in 1923 they met in the province which might be termed the cradle of Canadian history, Nova Scotia; with an extensive tour of the Maritime provinces supplementary to the convention held in the interesting old city of Halifax. In 1924 following the convention in Toronto, they went to the United Kingdom and the scenes of the World War in western Europe.

EDITORS, the same as readers, are liable to get into a rut and become circumscribed in their vision. The annual convention provides an opportunity to gain a wider knowledge of Canada and its problems; to gain a closer view of the life of the people in the various provinces, thereby enabling newspapermen to talk and write of general conditions with more than a local outlook. None of us can live unto ourselves alone, individually, provincially or nationally. Even nations cannot do so under the complexities and ramifications of international trade and commerce with the attendant problems.

A newspaper editor, in order to do his best to serve his community, must be forever vigilant to improve and broaden his own knowledge, as also must the tradesman who desires to improve his service to customers. In the constant effort to keep on the right side of the ledger, hunting news and securing advertising, time for study is very limited, consequently the annual convention provides an opportunity to slip away for a brief period and gain a fresh perspective on one's own work and possibly find some new ideas of benefit.

THE editor and his wife have therefore abandoned the daily round and the common task for a brief space to attend the convention and enjoy the attractions of the Pacific coast, which so many from Coleman have visited during this and previous summers. We trust we will return as delighted with the change as those who have already spent their summer vacations down by the seashore.

There is not a business but which can be helped by the use of advertising and printed matter. The man who is alive to opportunities and the advantages of rightly placed publicity does not have to be told—he already knows.

Here and There

An orchard consisting of only one tree which has borne 116 different varieties of apples and one variety of pears by means of careful grafting, is located in Eastern Canada. This season 47 varieties of apples put forth blossoms.

Canada produced 1,285,888 ounces of silver during March as compared with 1,597,114 ounces in February and 1,469,137 ounces in March 1932. 3,376,818 ounces were produced during the first quarter of 1933, a 17 per cent. decline as compared with the same period in 1932.

Hon. Frank L. Polk, acting secretary of state for the United States in 1918-19, well-known corporation lawyer and director of many companies including the Chase National Bank and the Northern Pacific Railway, is staying at the Banff Springs Hotel with his family for the summer vacation.

More than equalling expectations, the New York-Montreal cruise of the Duchess of Bedford set a new holiday record for special trips recently when 900 passengers took the excursion. Guaranteed a romantic moon every night and a picturesque run down the St. Lawrence, the passengers embarked steadily at the rate of three to the minute for five hours.

Wheat-cutting is now general in Manitoba and under way in the other prairie provinces, according to a recent weekly report issued by J. M. McKay, general agricultural agent, Canadian Pacific Railway, Western Lines. There is still, however, great need for further moisture, especially in the central and southerly parts of the grain-growing provinces.

Fresh from a victory in which he carried an appeal for a Chinese sentenced to hang, to the Privy Council, ending in commutation to life imprisonment, Rev. Father Joseph S. Donovan, of Maryknoll, N. Y., landed at Vancouver from Hong Kong aboard the Empress of Canada, recently. He was frankly pleased at his success in the role of priest-lawyer, but his only comment was: "We try to help where we can."

CLASSIFIED ADVERTISEMENTS

MODERN HOUSE FOR SALE: In desirable location, Sixth St., 6 rooms and bath room, basement, large pantry, making a splendid family residence. Enquire for particulars of Mrs. L. Fraser, Sixth Street.

Statesman From Antipodes Issues Grave Warning Respecting Building of Warships On Pacific

Hon. William Downie Stewart, M.P., former minister of finance in the New Zealand Government, the statesman who negotiated the trade treaties between New Zealand and Australia, Canada, Japan and Belgium, started members of the Institute of Pacific Relations by declaring the institute might well have taken up as a subject for discussion the present feverish building of battleships by great nations on both sides of the Pacific. His view was that if causes of friction were to be studied, building of war fleets could not properly be ignored. This should be done before serious events occur, he said.

"I am not a pessimist," he exclaimed towards the conclusion of his vigorous speech delivered from his wheel chair, for he is permanently crippled. "I may be a fatalist insofar as I realize if certain factors are at work they will produce a certain result unless a solution is found."

"When I see on both sides of the Pacific great nations feverishly building battleships, armadas maneuvering, I am bound to ask myself what for. If you build a mill it wants grit." "There is no peace machinery in the position," he continued, "and so the position seems to me grave and serious, disturbing and menacing. I will say if you talk war you will get war. And also it is futile to cry peace."

Canadians Eating More Pork

Figures For Last Year Show 91.79 Pounds Per Person

Reminiscence of the brave old days when a barrel of pork was considered an ever-ready standby in the pioneer's larder, Canadians in 1932, according to the latest statistics, ate more pork and less beef and eggs than in the preceding three years. In 1932, also, more turkeys, ducks and geese were eaten than in 1931, but less than in 1930 and 1929. Again, in 1932 the consumption of chickens was less than in the preceding year.

Reckoned in percentages, every Canadian man, woman and child in 1932 individually consumed 91.79 pounds of pork; 56.02 pounds of beef; 6.97 pounds of mutton; 7.87 pounds of chicken; 1.75 pounds of turkey; 4.1 of a pound of duck; 8.5 of a pound of goose, and 29.36 dozen eggs. The estimated total consumption for the last year is: Pork, 964,885,673 pounds; beef, 588,506,857 pounds; mutton, 73,182,356; chicken, 82,858,449 pounds; turkey, 18,424,840 pounds; duck, 4,285,215 pounds; geese, 8,870,600 pounds; and eggs, 297,948,339 dozen.—Dominion Department of Agriculture.

Menace To Poultry Stock

Lice Are Greatest Danger To Life Of Baby Chickens

Poultry experts and practical poultrymen recognize the danger to the life of the baby chick if it comes in contact with lice or mites. Prof. J. Holmes Martin, of the University of Kentucky, points out that much of the loss in baby chicks raised on the farm can be attributed to lice and mites. He says: "The most important single factor in preventing loss from these pests is to free the mother hen and brooding equipment from lice and mites before the chicks hatch."

To rid the flock of lice, Professor Martin suggests the simple treatment of applying Black Leaf 40 to the roosts about one-half hour before brooding begins. It should be painted on top of the roosts with a small paint brush or applied in a thin stream with an oil can. When the birds go to roost, fumes are given off which kill the lice while the birds are roosting. It is necessary of course, in order to get a complete kill that all the birds spend the night on the treated roosts.

Magazines For McGill

About 3,500 Received Regularly By Montreal University

McGill University, Montreal, is one of the largest subscribers of periodicals in the world. Statistics compiled show that the university regularly receives some 3,500 magazines. Some 2,000 of these are subscribed for in the regular way, a total of 450 are presentation subscriptions, while 565 are on the exchange list with other institutions. The entire collection has been rated one of the best in the world by visiting librarians.

W. N. U. 2010

Sleeping Sickness

Medical Men As Yet Know Very Little About This Disease

Both medical men and laymen are interested in what is going on these days at the County Hospital of St. Louis, Mo. There, in an isolated ward, many persons are in a stupor from which physicians are unable to rouse them. Some patients have died without waking, while others have managed to shake off their strange drowsiness and return to their homes and normal occupation, although they still are under medical observation.

Not very much is known about encephalitis, the form of sleeping sickness which afflicts these St. Louis patients. Not only is the germ unknown, but the means of infection and distribution has not yet been detected. The superintendent of the County Hospital thinks the present run of cases began with an outbreak of mosquitoes, so authorities in St. Louis poured oil on all patches of standing water and appealed to residents to remove tin cans, drain off ponds and take other precautions.

It is to be hoped this will have an effect. In the meantime laboratory specialists of the United States Public Health Service have undertaken a study of the current cases in the hope they may find some clue to the mystery of this unusual disease, which fortunately did not appear to be spreading very fast.—Detroit Free Press.

French Bread Unlike Ours

Is Darker In Color And More Like A Sponge

The difference between the bread eaten in France and that of Canada is mentioned by Arsene Henry, French Minister to Canada, as one explanation for the lack of demand for Canadian wheat in France. The hard wheat of Canada that is exported to France is used mostly for macaroni, spaghetti and such products, says Mr. Henry.

The ordinary bread bought in a baker's shop in France is not the white bread to which Canadians are accustomed. Instead it is a darker tint and is more like a sponge. It has a fine taste, but is not quite as good as the white bread made from Canadian wheat. At least that is the opinion of some of those who have eaten both kinds.

Danger In The Kitchen

Place Where Large Percentage Of Accidents Occur

The kitchen doesn't ordinarily seem like a dangerous place except perhaps, when a truly inept cook concocting indigestible dishes is hot and doesn't wish to be disturbed.

But there were 28,000 deaths last year from accidents which took place in the homes of the United States and fully 34 per cent. of these occurred in kitchens. Falls and scalds seem to be the most prolific sources of home accidents. And while it is a bit difficult to see just how a safety code can be devised and enforced for the home, a little care and forethought in the midst of the daily round of activities ought to save a good many lives each year.—Chatham News.

A great need of the soil for crop growth is that of an air supply. Everyone realizes the importance of air for animals, but that it is needed for plants is not such common knowledge.

EMBRACING HINDUISM FOR LOVE

A dramatic moment at Chalk Farm, London, as Miss Jessie Wonnack Medley, an English girl, was received into the Hindu faith. At the left is G. R. Patkar, son of a Hindu millionaire, whom she married a year ago. At the right is Dr. Moonge, president of the Hindu Mahasabha, who performed the ritual that made the girl a full-caste Hindu.

Lesson In Natural History

Fruit Dealer In London Says Wasps Work For Mankind

Do you hate wasps? Yes, but what do you know of them? I have received my first serious lesson in natural history writes a Daily Sketch correspondent.

Hyde Park is swarming with caterpillars, and Arthur, the 70-year-old work for mankind.

"Serves 'em right," she informed me. "Serves everybody right who owns 'em Park for killing all the wasps like they does." She has an idea that wasps are the natural exterminators of caterpillars.

"To think 'ow they're treated nowadays," she said, with a shake of her head. "I allus says to everybody. Don't be too 'ard on 'em, fer if it wasn't for the wasps there would be no fruit, although I own they be a bit of a nuisance when they commence to crawl."

"They don't sting unless they're provoked. Why, if it weren't for the wasps working 'ard all May you wouldn't get a strawberry, let alone a fruit 'arvest. Wasps be useful if they're let alone, and they do good work."

"I well remember the time," she went on somewhat dreamily, "when me uncle in the country used to count on the wasps to keep down the grubs and insects, let alone the flies. Think of the hundreds of midgits they can swallow at a stretch."

"On some fruit trees and bushes the leaves be all curled back in a most curious manner. The farmers and gardeners call it 'blight,' but if they wasn't so fond of killing the wasps there wouldn't be so much blight, and the farmers and market gardeners can't do fer their crops what the wasps can do. It's only since the farmers and the market gardeners 'ave 'unted the wasps and used insect-killers that there's been so much blight."

Delegates To League

Hon. R. J. Manion Will Head Canadian Personnel At Geneva

Canada will be represented at the meeting of the assembly of the League of Nations by Hon. R. J. Manion, Minister of Railways. Hon. Philippe Roy, Canadian Minister in Paris, and Dr. L. A. Riddell, Canadian Advisory Officer to the League. Announcement of the selection of the Canadian delegation was made by Sir George Perley, Acting Prime Minister.

Dr. Manion will head the delegation and left for Europe on Sept. 2. This will enable him to make a study of the situation before the opening of the assembly in Geneva on Sept. 25. Two substitutes were also named, Hon. G. Howard Ferguson, Canadian High Commissioner in London, who is now in Canada, and J. Deay, of the London Office.

Scotch Boys Growing Taller The average schooling in Edinburgh is two inches taller and 10½ pounds heavier than the boys who attended school in the 1913-14 session, while the girls are half an inch taller, and eight pounds heavier. These figures are revealed in a report just issued by Dr. John Guy, medical officer of health.

Forest Nursery Stations Show What Can Be Accomplished In Reforestation Of The West

The scheme under which trees are supplied by the Dominion Government for prairie farm planting in Manitoba, Saskatchewan and Alberta, was first inaugurated in 1901 by the late Hon. Clifford Sifton, who was at that time Minister of the Interior. At that time the general opinion was that trees could not be grown on the prairie and for that reason it was very difficult to interest farmers in this line of work. In January and February of 1901 a large number of farmers' meetings were held in the three provinces, at which the scheme was discussed. Very little enthusiasm, however, was aroused, only some 50 farmers in the three provinces expressed willingness to try out what they considered a very doubtful experiment. These first few plantings were successful and next year there was a larger demand, and 470,000 young trees were supplied to 421 farmers. Neighbors became interested, encouraged by the success of these first plantings. In 1904 1,800,000 plants were furnished to 1,020 applicants. From then on the demand increased by leaps and bounds. In 1929, 6,500 applicants received 8,500,000 trees and since that time from 5,000 to 6,000 applicants have been supplied each year.

Up-to-date 133,000,000 trees and cuttings have been sent out from the nurseries of which 2,500,000 were spruce and pine. The Scotch pine and spruce are the evergreen principally used, and these are sold at a very nominal cost. Next spring the charge for these will be \$2 per hundred. The broad leaf kinds, such as maple, ash, elm, caragana, poplars and willows are supplied free of charge provided the farmers make application before the first of March in the year previous to planting. That is, those wishing new plant in 1935 must apply before March 1, 1934.

In order to ensure a supply of stock for distribution, two nurseries were established, one at Indian Head, Sask., and the other at Sutherland, Sask. The control of the work is organized at Indian Head where the main office is established.

Until 1920 the tree planting division was a part of the federal forestry branch under the department of the interior, but in the spring of that year, after the natural resources were turned over to the province, the forest service was reorganized and it was decided to transfer the tree planting division to the department of agriculture, so that the nurseries now are part of the experimental farms system, under Dr. B. Archibald, director of experimental farms, at Ottawa.

The results of the work which has been carried on from the Dominion nursery stations during the past 30 years is very evident to any who were familiar with conditions on the prairie farms in the earlier years of development. While conditions, generally, on the prairies, are not particularly favorable for tree growth, it has, nevertheless, been conclusively demonstrated that when proper methods are employed, successful plantations are not really difficult to establish. On the prairies where rainfall is so limited and climatic conditions extreme, plantations can only be successful when given proper attention. Where trees are neglected, they quickly deteriorate, but the benefits which may be derived from well planned shelter belts are so great that one is well repaid for the comparatively small amount of labor entailed in keeping them in good condition.

The farmer in these times of stress is realizing more and more what it means to have a good garden and fruit plot, which cannot be developed satisfactorily without adequate protection. Perhaps it is on account of the very unsatisfactory farm conditions at the present time that more interest is being shown in tree planting than ever before. Then, too, more interest is being paid to the improvement of the farm home by plantings of ornamental shrubs and flowers. Many who now have established shelter belts are getting very satisfactory results with fruit of various kinds, such as apples, crabapples, plums, hybrid cherries and all varieties of small fruits. Besides affording a very interesting line of work, practically all the fruit required for the farm family can be raised at home and often a very considerable surplus is raised which can readily be dis-

posed of to neighbors at very remunerative prices.

At the Indian Head forestry station the grounds are laid out attractively planted with trees, ornamental shrubs, flowers and lawns and provides an excellent demonstration of what can be accomplished along these lines under prairie conditions. A small area is set aside also in which hardy varieties of apples and other tree fruits are grown, several acres of different kinds of trees in various mixtures, which are of particular interest to those who may have any doubt as to the practicability of growing a home supply of fuel and fencing material. These plantations varying in age from 15 to 21 years furnished over 85 cords of wood last year from trees cut out as thinnings.

Visitors are always welcome and any who are within reasonable distances either the Indian Head or Sutherland nursery stations, would be well repaid by spending a few hours going over the grounds and plantations.

Fame Is Borrowed

Leghorn Is Italy Neighbor; Makes No Bred Chickens

Livorno, better known to the English-speaking world as Leghorn, is to have a new port. Work is proceeding on dredging and construction operations in the harbor, which straits with Genoa and Naples much of the maritime trade of Italy's Mediterranean seacoast.

"Livorno has been a main-spring port since the days of the Medici," says a bulletin from the National Geographic Society. "When Pisa's harbor near the mouth of the River Arno silted up in the sixteenth century, near by Livorno, then a village of less than 200 inhabitants, was selected by Cosimo, Grand Duke of Tuscany, to replace it."

"Livorno is best known under its anglicized name for two things: straw hats and chickens, for nearly every one has heard of Leghorn straws and Leghorn chickens. But Livorno doesn't produce hats nor does it breed chickens. Like Panama, which became famous for the closely woven hats of Ecuador merely because they passed through the Isthmus, Livorno has borrowed the fame of straw hats woven in the interior of Ecuador, chiefly among Florence. They come out through Livorno, or Leghorn, so to that city their origin is popularly credited."

"For the same reason a breed of small Italian chickens, sometimes referred to as the greatest egg-laying machines of the poultry world, were given the name of the port through which many of them were exported to America and to Great Britain."

Not Due To Ancestry

Mongrel Dog Can Be As Intelligent As Thoroughbred

One of the remarks most often heard when dogs are discussed is that the mongrel is both more intelligent and more trustworthy than the thoroughbred. It is charged that the thoroughbred is bred for "pint" without regard to anything else, so that in the course of time he becomes a half-wit. The mongrel is not bred at all. He just happens.

The dog expert of the London Morning Post, however, insists that the thoroughbred is the equal if not the superior in intelligence to the mongrel.

The truth probably is that intelligence in dogs, as in human beings, is not so much a matter of breeding as of individual capacity for understanding. Shakespeare, for example, had no noble blood, and his intellect was the best of his time in England. Elizabeth, who was descended from a long line of royal ancestors, and was what in dogs would be called a thoroughbred, had a finer intelligence than her ancestors or her successors in her own family.

But every dog owner will insist that the intelligence of his four-footed friend is due to the ancestry, whether mongrel or pedigreed. The only thing that matters, however, is the animal's intelligence.—New York Evening Post.

An old bachelor says that it is impossible for a woman to do anything better than a man. Evidently he has never seen a woman pack a trunk.

Somebody says snobbery is more rampant at flower shows than anywhere else. Haughty culture, no doubt.

Personal and Local

George and Evan Morgan returned on Sunday from Vancouver where they had been attending the funeral of their brother.

Bellevue and Hillcrest tied for first prize in football at Bellevue on Labor Day. Coleman lost to Bellevue 2-1 in the first half.

Mr. and Mrs. Hyde and daughter of Kaslo, Alta., were the guests of Mr. and Mrs. Robert Evans over the weekend.

Colonel J. A. Macgregor, inspector of schools, Calgary, and family, spent the weekend in Coleman visiting Mrs. Macgregor's sister, Mrs. A.G. Bowling.

Mr. and Mrs. H. T. Halliwell are attending the annual convention of the Canadian Weekly Newspaper's Association in Vancouver.

All Pass towns were well represented at the Bellevue Exhibition on Labor Day. Mr. Fauville, Mr. H. Harris and Mr. G. Reid were among the prize-winners from Coleman.

J. S. D'Appolonia through an advertisement in The Journal advises those who intend building or extending their premises to arrange now for purchases of material, thereby avoiding the increased cost of materials which will prevail. He would be pleased to furnish estimates on all classes of construction and alterations.

Archie Beveridge's garden presents a pretty sight as one reaches the top of the hill leading to Sixth Street. This year he extended it and built a stone wall, providing additional scope for his handiwork as a gardener. The grounds of Jas. M. Allen's residence also attract the attention of those who take a stroll on the hill. Further up the hill at "Tree-Top" or "Spey Royal" Mr. and Mrs. J. A. McLeod's gardening industry is demonstrated by quite an extensive area of cultivation of flowers and vegetables.

Mr. and Mrs. Dwight Hulbert left on Friday last for Calgary, after spending the summer at Crows Nest Lake, during which time Mr. Hulbert has been carrying on business in the Pass towns as representative for the Commercial Life Assurance Co. of Edmonton. They made many friends here, and through The Journal desired to express their appreciation for many kindnesses and hospitality extended to them.

The marriage is announced by Mr. and Mrs. J. Nash of their daughter, Phyllis Victoria, to Kenneth R. Blain, son of Mr. and Mrs. R. Blain of Vancouver, on August 18, the Rev. John Wood, pastor of Bellevue United church, officiating. Both are well known, the bride having grown up from childhood here, while the bridegroom has for two or three years lived here and at Blairmore. Their many friends among the younger people wish them joy and happiness.

Miss Gladys Higginbotham entertained a few friends on Wednesday evening of last week at her home. Cards were played. The winners were: ladies first, Miss Grace MacKinnon, consolation, Miss Nora McLeod; gents first, Mr. W. Clarke, consolation, Mr. L. Younker of Blairmore. After lunch a very enjoyable evening was spent in music and dancing. Miss Higginbotham left on Friday for Youngstown where she will resume her duties as teacher. She was accompanied by Marie Barclay of Edmonton who has been spending a few weeks here.

Enquiry was made by a ratepayer why supplementary examinations for high school pupils were not held in Coleman. Chairman Allen of the school board states that the department decides on the examination centres. No provision is made for payment of supervising examiners for these exams, the principals in each centre doing this additional work. Two years ago Coleman was the centre, and sometimes it has been at

Fincher Creek, entailing expense and inconvenience to students. Blairmore was chosen for 1932 and 1933, as being central for the group of Pass towns.

NOTICE TO READERS!

Owing to The Journal being published a day ahead of the usual time, late news is held over till the next issue on Thursday, Sept. 14.

Copies of The Journal will be delivered weekly at Coleman homes by Armand Celli or Matthew Brennan, or may be purchased at McBurney's drug store. Save the coupons on top of front page, and watch for further details.

IN MEMORIAM

In loving memory of our dear son, Albert Brocklehurst, who died on Sept. 4, 1928 at Coleman. Ever remembered by his loving parents, Mr. and Mrs. Samuel Brocklehurst, Calgary.

ANNOUNCEMENT

Dr. A. E. Shore, of Drs. Gunn, Hackney & Shore, Calgary, will be at the office of Dr. R. F. Stewart, Blairmore.

Saturday afternoon, September 16th. Anyone wishing to consult him with regard to eye, ear, nose or throat or to be fitted with glasses, please make appointment with Dr. Stewart.
